Genova Diagnostics

Genova Diagnostics offers tests that combine standard and innovative biomarkers designed to provide a more complete understanding of specific biological systems that can help physicians diagnose and treat or prevent chronic disease. These tests include, Nutritional Deficiency testing, Hormonal Testing, Allergy Testing, Specialized Stool testing, Genetic Testing, and much more.

Two tests we commonly order from Genova are the **NutrEval FMV urine and blood test** and the **GI Effects Stool Profile**.

If you are doing the NutrEval FMV, there are instructions describing the preparation process in detail. Please **click here**. Once you are on this page you can download the PDF of the details for collection of the sample or **click here** for the PDF.

If you are doing the GI Effects Stool Profile, the three day test is more thorough than the 1 day especially if there is a concern related to parasites. **Instructions for the 3 day sample collection; Instructions for the one day collection**

To learn more about their testing, **click here** and you will see the list of all their testing, and then click on the test of interest to learn about an individual test.

Patients with commercial insurance are required to pay up front for testing. The cash pricing is at a discounted rate and can be paid up front or in four monthly installments.

Genova will create receipts available for HSA and FSA accounts.

There is no pre-pay amount or balance billing for medically necessary testing with Traditional Medicare as the primary insurance unless the testing is not covered by Medicare, i.e. genetic testing.

For more information about their billing options for commercial insurances and government programs, i.e. Medicare, **click here**.
